Food Waste Prediction and Reduction Analytics Using R

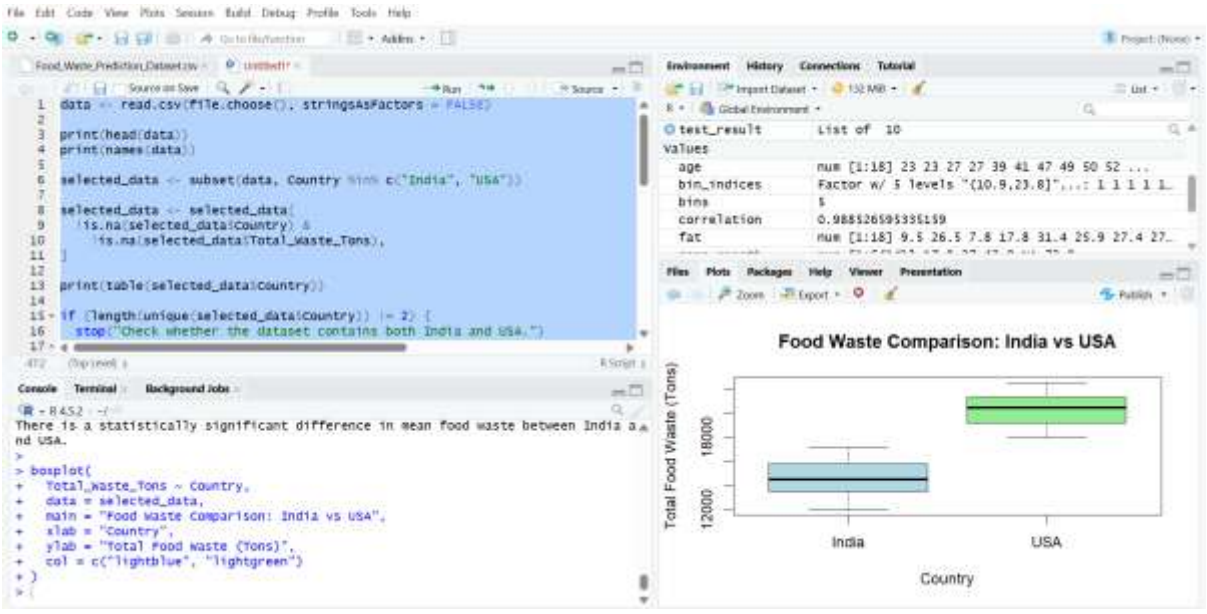

Module 1: Exploratory Data Analysis

1) Question 1: Does total food waste differ significantly between India and the USA?

- Test: Independent Samples t-test

- Variables: Total_Waste_Tons and Country

- Graph: Box plot

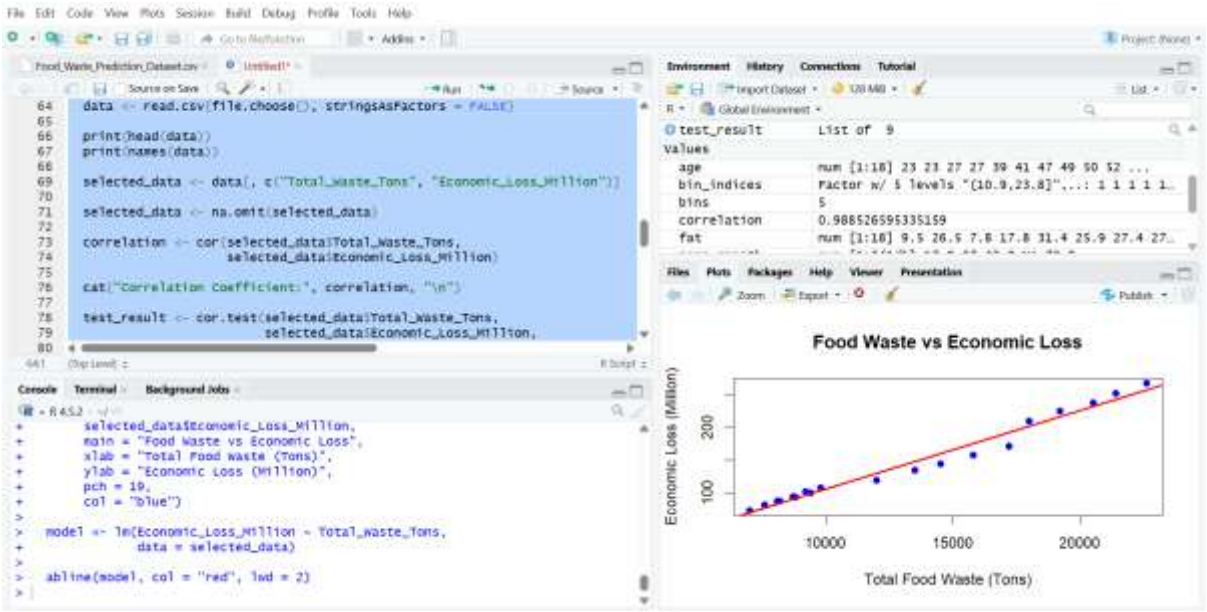

Question 2: Is there a significant relationship between total food waste and economic loss?

- Test: Pearson Correlation Test

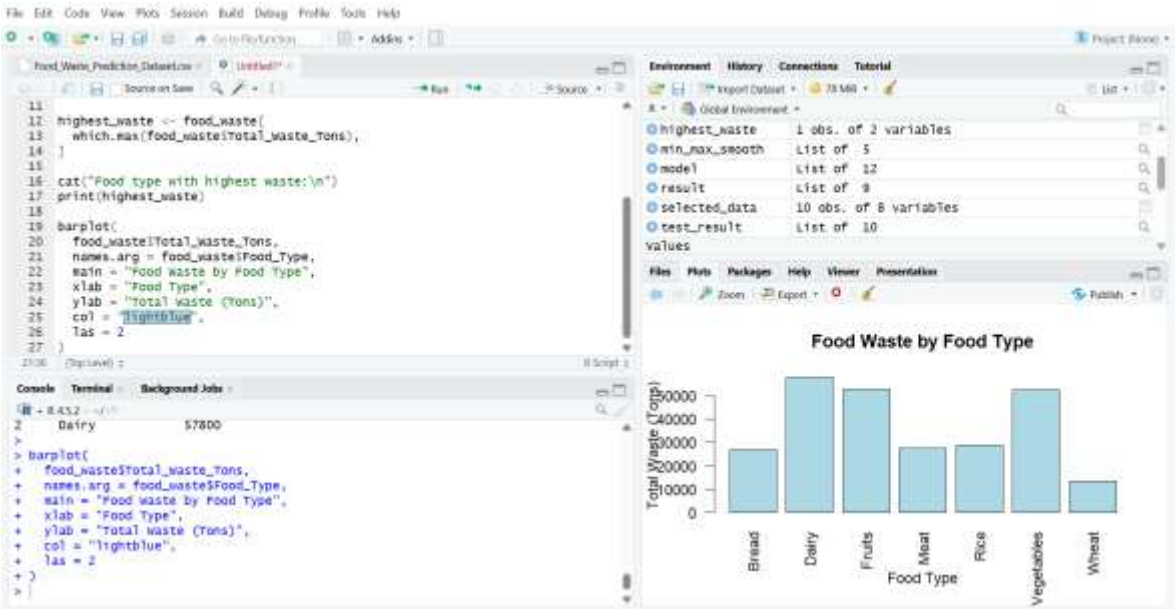

- Variables: Total_Waste_Tons and Economic_Loss_Million

- Graph: Scatter plot with a trend line

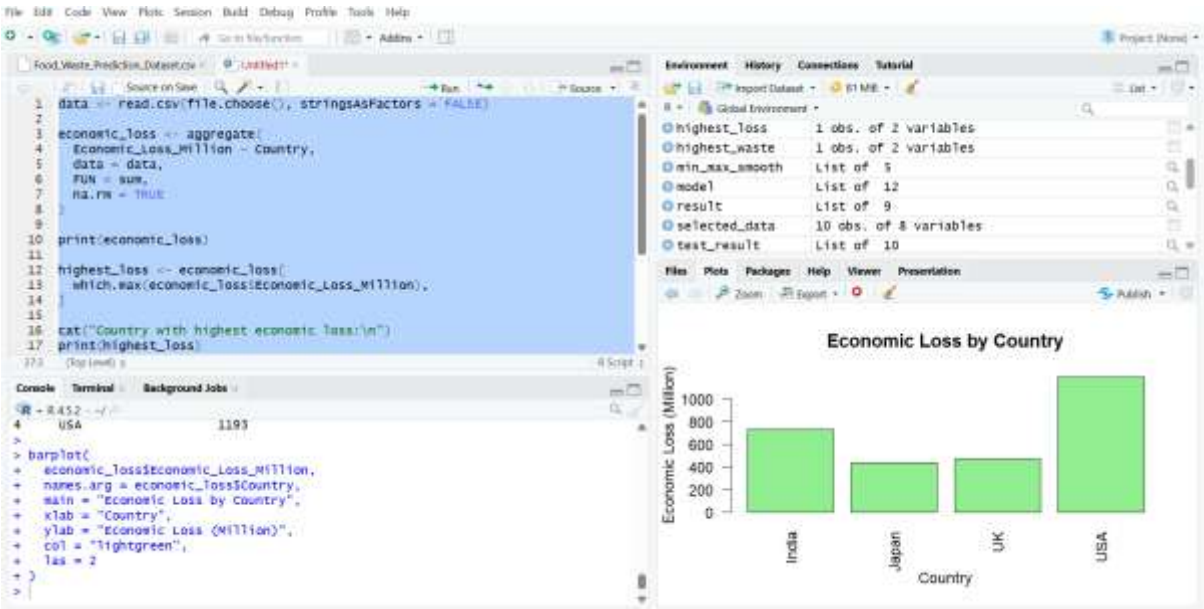

Question 3: Which food type has the highest total food waste?

- Test: Descriptive Statistical Analysis
- Variables: Food_Type and Total_Waste_Tons
- Graph: Bar chart

QUESTION 4: Which country has the highest economic loss due to food waste?

Test: Descriptive Statistical Analysis
Variables: Country, Economic_Loss_Million
Graph: Bar Chart

QUESTION 5: Is there a significant relationship between population and total food waste?

Test: Pearson Correlation Test
Variables: Population, Total_Waste_Tons
Graph: Scatter Plot with Trend Line
